NOT JUST SOLUTIONS!

We at Hyper are not just about solutions to the challenge, but it's a whole process, from the very first mapping for customization, to the very nick of handover of the solution, there is a follow-up, on either ends, for the smooth functioning, and the further treatment spares required are also, provided by the limited. No grief is left unresolved and the dedicated team makes sure that the matter at hand is disposed off with meaningful solution and the client is satisfied to the core. Only perfection is what we believe and preach at Hyper Daily.

POLYESTER DYEING AND PET-FIBER EFFLUENT TREATMENT PLANT

It is a 2-Unit Plant-700 KLD of PET fiber Effluent Treatment and 600 KLD of Polyester Dyeing Unit. The effluent consists of the dirt that is washed off of the PET bottles that are recycled for fiber. The reject effluent from polyester dyeing unit is of very High COD. This is a complete Zero Liquid Discharge System with 97% recovery, meaning not a single drop of water gets discharged and is recycled- and reused.

**CAPACITY
1300 KLD**

DISTILLERY

It is a raw water treatment plant of capacity $125\text{m}^3/\text{hr}$ based on high recovery of 97%.

It is a Distillery-Grade Raw water treatment Plant to provide commercial zero conductivity water.

CAPACITY
 125m^3 Per hour

THE FOUNDER'S MESSAGE

Mr. S.K Gupta

As things are getting back to Post-Covid Normal or the new normal we are looking towards new opportunities and horizons that are yet to be measured. And with new beginnings we are looking forward to serving more people. And helping in improving environmental conditions for the generations to come.

"ALL THAT HYPER IS AND WILL BE, IS BECAUSE OF THE NEVER-ENDING EFFORTS OF ALL IT'S EMPLOYEES AND CLIENTS WHO BELIEVE IN US AND OUR VISION EVERY SINGLE DAY"
